**ACKNOWLEDGEMENTS**

This scientific assessment and new research has been funded by the Australian Government Department of the Environment, the Commonwealth Scientific and Industrial Research Organisation and the Australian Bureau of Meteorology. The work has benefited from a high degree of cooperation between these agencies and the project stakeholders.

**LEAD SCIENTIST AND EDITOR**

Penny Whetton

**EDITORS**

Marie Ekström, Chris Gerbing, Michael Grose, Jonas Bhend, Leanne Webb and James Risbey.

**CHAPTER AUTHORS**

**CHAPTER 1** Penny Whetton, Paul Holper

**CHAPTER 2** John Clarke, Leanne Webb, and Kevin Hennessy

**CHAPTER 3** Rob Colman, Aurel Moise, Scott Power, Karl Braganza and Ian Watterson

**CHAPTER 4** Karl Braganza, Brad Murphy, Bertrand Timbal, Pandora Hope, Andrew Dowdy, Kevin Hennessy, Jonas Bhend and Dewi Kirono

**CHAPTER 5** Aurel Moise, Jonas Bhend, Ian Watterson and Louise Wilson

**CHAPTER 6** Jonas Bhend, Ian Watterson, Michael Grose, Marie Ekström and Penny Whetton

**CHAPTER 7**

- 7.1 Ian Watterson, Tony Rafter, Louise Wilson, Jonas Bhend and Craig Heady
- 7.2 Penny Whetton, Aurel Moise, Dewi Kirono, Tony Rafter, Louise Wilson, Kevin Hennessy, Jonas Bhend, Pandora Hope, Bertrand Timbal, Andrew Dowdy, Ian Watterson, Michael Grose, Sugata Narsey and Janice Bathols
- 7.3 Kathy McInnes, Aurel Moise, Debbie Abbs, Bertrand Timbal, Pandora Hope, Andrew Dowdy and Louise Wilson
- 7.4, 7.5 & 7.6 Dewi Kirono and Louise Wilson

7.7 Freddie Mpelasoka, Francis Chiew, Ian Watterson, Jonas Bhend and Louise Wilson

7.8 Chris Lucas

**CHAPTER 8**

Kathy McInnes, Didier Monselesan, John Church, Andrew Lenton and Julian O'Grady

**CHAPTER 9**

Kevin Hennessy, Leanne Webb and John Clarke

**CHAPTER 10**

Paul Holper and Penny Whetton

**APPENDIX A**

Ian Watterson

**PROJECTIONS ANALYSIS SUPPORT**

Janice Bathols, Tim Bedin, Tim Erwin, Craig Heady, Yun Li and Louise Wilson

**PROJECT COORDINATION**

Paul Holper, Kevin Hennessy, Carol Grossman and Mandy Hopkins

**PEER REVIEW**

David Karoly (University of Melbourne), Andrew Tait (National Institute of Water and Atmospheric Research, New Zealand) and Michael Hutchinson (Australian National University)

**DESIGN AND LAYOUT**

Alicia Annable, Liz Butler and Siobhan Duffy

**EDITORIAL SUPPORT**

Stephanie Baldwin

*We acknowledge the World Climate Research Programme's Working Group on Coupled Modelling, which is responsible for CMIP, and we thank the climate modelling groups (listed in Table 5.2.2 of this Report) for producing and making available their model output. For CMIP, the U.S. Department of Energy's Program for Climate Model Diagnosis and Intercomparison provides coordinating support and leads development of software infrastructure in partnership with the Global Organization for Earth System Science Portals.*

CSIRO and Bureau of Meteorology 2015, Climate Change in Australia Information for Australia's Natural Resource Management Regions: Technical Report, CSIRO and Bureau of Meteorology, Australia

**DISCLAIMER**

No responsibility will be accepted by CSIRO or the Bureau of Meteorology for the accuracy of the projections in or inferred from this Report, or for any person's reliance on, or interpretations, deductions, conclusions or actions in reliance on, this Report or any information contained in it.

## TABLE OF CONTENTS

EXECUTIVE SUMMARY .....	5
CHAPTER 1 INTRODUCTION .....	11
CHAPTER 2 USER NEEDS AND REGIONALISATION .....	14
2.1 Assessing user needs .....	14
2.2 Meeting user needs .....	15
2.3 Sub-dividing Australia .....	16
CHAPTER 3 GLOBAL CLIMATE CHANGE SCIENCE .....	23
3.1 Factors driving climate variability and change .....	23
3.1.1 Internal (“unforced”) climate variability .....	23
3.1.2 External forcing factors .....	24
3.2 Emissions scenarios and climate models .....	25
3.2.1 Future scenarios of greenhouse gas concentrations .....	25
3.2.2 Global climate models .....	27
3.3 Introduction to climate model ensembles and to the CMIP5 ensemble .....	28
3.3.1 The Coupled Model Intercomparison Project Phase 5 (CMIP5) .....	28
3.4 Observed global trends and their attribution .....	32
3.5 Global climate change projections .....	34
3.6 Comparison of CMIP3 and CMIP5 global projections .....	36
3.6.1 Global sensitivity of the CMIP3 and CMIP5 models .....	36
3.6.2 Model responses to global warming in the Asia-Pacific region .....	37
CHAPTER 4 UNDERSTANDING RECENT AUSTRALIAN CLIMATE .....	40
4.1 Australian climate variability .....	40
4.1.1 Tropical modes .....	40
4.1.2 Extra-tropical modes .....	41
4.2 Observed trends and attribution in the Australian region .....	42
4.2.1 Temperature .....	42
4.2.2 Rainfall .....	43
4.2.3 Changes in circulation in the Australian region and their possible association with rainfall trends .....	46
4.2.4 Drought .....	48
4.2.5 Snow .....	49
4.2.6 Surface winds over continental Australia .....	49

4.2.7 Tropical cyclones .....	49
4.2.8 East coast lows .....	49
4.2.9 Solar radiation .....	50
4.2.10 Surface humidity .....	50
4.2.11 Pan evaporation .....	50
4.2.12 Fire weather .....	51
<b>CHAPTER 5 EVALUATION OF CLIMATE MODELS .....</b>	<b>53</b>
5.1 Introduction .....	53
5.2 Evaluation based on climatological characteristics .....	53
5.2.1 Assessment of historical mean climatologies: temperature, rainfall and mean sea level pressure .....	54
5.2.2 Assessment of spatial structure of historical mean climatologies: M-scores for rainfall and temperature .....	59
5.2.3 Assessment of annual cycles of historical climate: rainfall and temperature .....	61
5.2.4 Assessment of additional climate features and associated skill scores .....	63
5.3 Evaluation of simulated rainfall and temperature trends .....	70
5.4 Evaluation of extremes in climate models .....	72
5.5 Evaluation of downscaling simulations .....	73
5.6 Synthesis of model evaluation .....	74
<b>CHAPTER 6 CLIMATE CHANGE PROJECTION METHODS .....</b>	<b>78</b>
6.1 Limitations and uncertainties in climate change data .....	78
6.1.1 Sources of uncertainty .....	78
6.1.2 Interpretation of ranges of change in projections .....	79
6.2 Regional projection methods .....	80
6.2.1 Overview and comparison of existing regional projection methods .....	80
6.2.2 Projection methods used in this Report .....	82
6.2.3 Comparison with climate change in Australia 2007 .....	83
6.3 Downscaling .....	85
6.3.1 What is downscaling? .....	85
6.3.2 Combining insights from downscaling and GCM projections .....	86
6.3.3 Statistical and dynamic downscaling methods used .....	87
6.3.4 Pros and cons of statistical and dynamical downscaling .....	87
6.3.5 Areas of greatest potential added value .....	87
6.3.6 Availability .....	88
6.4 Assessing confidence in projections .....	88

CHAPTER 7 PROJECTIONS: ATMOSPHERE AND THE LAND .....	91
7.1    Surface temperature .....	91
7.1.1    Average temperature .....	91
7.1.2    Extreme temperature .....	95
7.2    Rainfall .....	99
7.2.1    Projected mean rainfall change.....	99
7.2.2    Projected extreme rainfall change .....	118
7.2.3    Drought .....	119
7.2.4    Snow .....	123
7.3    Winds, storms and weather systems .....	125
7.3.1    Mean and extreme winds.....	125
7.3.2    Synoptic systems.....	129
7.4    Solar Radiation.....	131
7.5    Humidity.....	133
7.6    Potential evapotranspiration .....	134
7.7    Soil Moisture and runoff.....	136
7.7.1    Projected changes in soil moisture .....	136
7.7.2    Projected changes in runoff.....	137
7.8    Fire weather .....	139
CHAPTER 8 PROJECTIONS (AND RECENT TRENDS): MARINE AND COASTS .....	143
8.1    Sea level rise.....	143
8.1.1    Factors contributing to sea level change .....	143
8.1.2    Historical global mean sea level change.....	143
8.1.3    The Australian coastline .....	144
8.1.4    Global projections.....	146
8.1.5    Regional projections for Australia for the 21st century .....	148
8.1.6    Caveats.....	152
8.1.7    Beyond 2100 .....	153
8.2    Extreme sea levels .....	153
8.3    Sea surface temperature.....	157
8.4    Sea surface salinity .....	160
8.5    Ocean acidification .....	162

CHAPTER 9 USING CLIMATE CHANGE DATA IN IMPACT ASSESSMENT AND ADAPTATION PLANNING .....	167
9.1    Introduction .....	167
9.2    Conducting a climate change impact assessment .....	168
9.2.1    Establishing the context .....	168
9.2.2    Risk identification .....	168
9.2.3    Risk analysis .....	169
9.2.4    Risk evaluation and risk treatment .....	175
9.3    Information products for risk identification and analysis .....	175
9.3.1    Climate change in Australia website .....	175
9.3.2    Decision tree .....	175
9.3.3    Report-ready projected change information .....	177
9.3.4    Climate data .....	177
9.3.5    Climate analogue tool .....	183
9.3.6    Links to other projects .....	183
CHAPTER 10 RESEARCH DIRECTIONS .....	186
10.1    Understanding climatic variability and monitoring change .....	186
10.2    New climate model ensembles .....	187
10.3    Targeted projection products and communication .....	187
10.4    Conclusions .....	187
APPENDIX A COMPARISON OF CMIP3 AND CMIP5 CHANGES OVER AUSTRALIA .....	188
REFERENCES .....	192
NRM GLOSSARY OF TERMS .....	212
GLOSSARY REFERENCES .....	216
